

Position: Software Engineer (Laravel Developer), Vacancy-01

About Sokrio Technologies: Sokrio Technologies Ltd. is a team comprised of multi experienced and ambitious individuals. We genuinely keep our customers at the core of our business and strive to go beyond the boundary to deliver WOW to our customers! We believe in continuous development and strive to deliver incremental positive customer experience to our stakeholders. Our core competence lies in developing mobile and web-based applications. Our technology team has the experience of developing and managing ITES products and IT projects for customers worldwide.

Experience Requirements:

2+ Years

Your primary job responsibilities:

- Write RESTful API's with Laravel/Lumen.
- Design and develop and operate microservices that serve millions of users.
- Writing frontend codes with Vue.js/React.js.
- Talk to different APIs, creating scalable scheduling and job queues that scale to multiple servers.
- Develop different modular packages.

You will be a good fit for the position, if you have:

- Professional experience with Laravel Framework.
- Clear knowledge and understanding of Laravel Service Container, Service Provider, and Facades.
- Ability to build and consume RESTful web services.
- Competent with revision control systems (Git)
- Code optimization and performance improvements
- A knowledge common Design Patterns (SOLID)
- Passionate about writing beautiful and clean code
- Experience on Vue.js/ React.js

Educational Requirement

It doesn't matter where you went to college or what your CGPA was as long as you are smart, passionate, ready to work hard, and have fun.
